

KLG-GOPA-2

KLG-GOPA-2 is 5 grams of aqueous graphene oxide paste, in a single sealed glass jar. Kennedy Labs' graphene oxide is produced using a Modified Hummers' method.

This aqueous paste is 50% graphene oxide and 50% water - no HCl. KLG-GOPA-2 was dried completely and then dispersed in de-ionized water. It is an acid with about 6.5 mmol total acidity per 5 mg jar.

Specification

Quantity	5 grams
Unit	Glass jar
Colour	Black
Consistency	Paste
