“It should be understood that any object, item, material or person could be a source of static electricity in the work environment. Removal of unnecessary nonconductors, replacing nonconductive materials with dissipative or conductive materials and grounding all conductors are the principle methods of controlling static electricity in the workplace, regardless of the activity.” [ESD Handbook ESD TR20.20-2008 section 2.4 Sources of Static Electricity]

Unless otherwise noted, tolerance ± 10%
