

OPTEK OPB780KIT **OPB780 Evaluation Kit**

OPTEK Technology's OPB780Z color sensor uses a light-to-frequency converter that combines 64 configurable silicon photodiodes, with a white LED in a small, lightweight package that makes it ideal for using in miniature applications. The OPB780KIT is designed to provide the design engineer an easy way to evaluate the capability of the OPB780Z color sensor.

Market Segments

- Commercial
- Industrial
- Medical
- Vending
- Food Processing Equipment

Applications

- Color Matching
- Color Verification
- Color Change

Features

- OPB780Z Color Sensor
- Evaluation PC Board
- 10" Flat Flexible Interface Cable
- Evaluation Software (USB Drive Stick)
- Operating Instructions

Competitors

- None

Optek Differentiating Features

- No competition
- Plug & Play
- Production Ready
