Portable Printers

TLS2200® Label Printer

A rugged, portable, and easy-to-use labeling solution with crisp, thermal-transfer quality printing and a variety of durable materials. Create custom labels for the most demanding applications including product bar code ID, electrical and datacomm marking, laboratory ID, security ID, and more.

TLS PC Link™ Label Printer

A small footprint and lightweight, rugged design makes the TLS PC Link printer a nice fit for a variety of medium volume (approximately 500 labels per print run) applications. It connects to a PC for use with the included LabelMark™ software or other Windows based programs.

The same basic design as the TLS 2200® allows you to utilize the same consumables (including bulk rolls) in both the TLS 2200 and the TLS PC Link.
