

Regarding your question on the cable size acceptance for the Buccaneer range, the sizes are as follows:-  
2 and 3 way (pins and sockets) - hole diameter is 2.0mm., csa of 3.14mm.sq.  
4, 6 and 7way (pins and sockets) - hole diameter is 3.3mm., csa of 5.18mm.sq.  
This means that the connectors will accept wires up to 3mm.sq. and 5mm.sq. respectively but the customer must remember that the outer sheath diameter cannot exceed the 8.1mm specified in your catalogue.  
With reference to your more specific question of the PX0740/S, the terminals will accept 0.5mm.sq. wire.
