

2mm Pitch, Positive Lock, Wire-to-Board Connector

DF51 Series

■ Features

1. Positive lock provides clear tactile click and secures reliable connection

The locking mechanism delivers a clear tactile click, which prevents incomplete mating. (Fig.1)

2. Wide variation

Each of Straight / Right angle / In-line configuration equipped with single row and dual row for flexible design. Gold and Tin plating options support various application needs.

3. Secure Side-locking design

Short depth straight type and low profile right angle type are well suited for compact / thin equipment. (Fig.3)

4. Prevents incorrect mating

Visually and mechanically polarized features prevent reverse mating and incorrect mating between different number of positions. (Fig.2)

5. Use common terminals and crimping tools with DF11 Series

Wide applicable cable range : 22 to 30 AWG.

6. Suitable for potting

Capable of being potted, up to 3mm.

■ Applications

Office automation, Industrial machinery, Industrial robots, Amusement equipment, Medical equipment.

Secure Mating

Matches the peak of insertion force, provides clear click sound and tactile click

◆ Precautions for use

1. The connector could be damaged if it is pulled out forcibly. When it is hard to pull out, push it in slightly first and then depress the lock and un-mate. Please refer to "DF51 mating and unmating Procedure Document (ATAD-H0847-00)" for points in handling regarding mating operations.
2. When fitting a crimped contact into a socket, please refrain from oblique insertion for keeping performance reliability.

◆ Operating environment

Please contact us if you are designing this connector into environmental conditions where high and low temperatures are repeated.
