

IX Series

■ Overview

Multi-purpose small-sized I/O connector for industrial machinery.
Conforming to IEC Standard IEC 61076-3-124
Compact size, robust and high speeds.
High EMC resistance.

■ Features

1. Contribution to size reduction

The ix Industrial offers a reduced size of 75% compared to conventional RJ-45 modular solutions. This size reduction allows for reduced installation space. Parallel-mounting at P=10mm is possible.

2. Single action lock design

The connector locks by simply inserting the plug into the receptacle. An audible click insures locking. The lock can be released by pushing a button on the plug leading to smooth removal.

3. Robust design resistant to prying forces

The PCB-mounted receptacle shell is designed to minimize the influence of prying force from the plug on the mated surface. Additionally, the PCB-mounted shape is designed to protect the contacts. Unique metal hold down placement prevents peeling of contacts. Stainless steel material is used for metal parts to enhance the mechanical strength.

4. High EMC Resistance

Optimized shielding design guarantees high EMC resistance to secure safe data transmission.

5. High Data Rate Transmission

Cat.5e (1Gbps) and Cat.6^A (10Gbps) high-speed Ethernet performance.

6. PIP (Pin-In-Paste) mounting possible

The receptacle shell is mounted at the through hole section of the PCB to enhance the mounting strength of the PCB. Both signal contact SMT and PIP mounting allows for reflow-mounting and reduction of man-hours required for board processing.
