

**Bottom Cover Kit**

is installed on the back of the enclosure to provide an additional mounting surface for Type 4X dual access applications. Kit includes clear polycarbonate cover, polyamide cover screws, and adapter bushing.

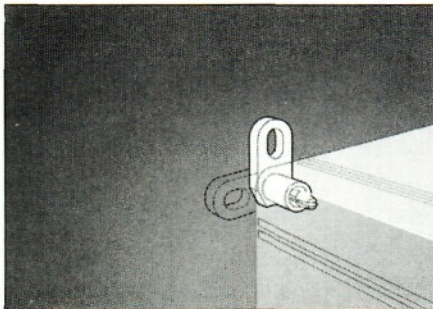

Note: No mounting provision is available at this time. Please consult Hoffman.

**Hinge Kit**

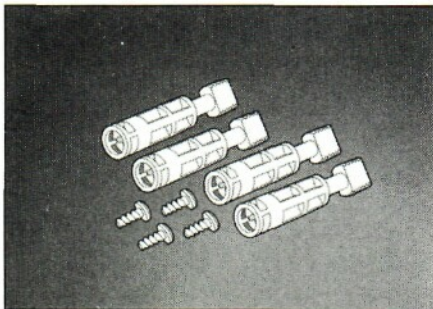

includes two polyamide hinges, eight M4 self-tapping zinc plated screws, eight flat washers, and drilling template.

Note: Kit may not meet Type 4 requirements and should therefore be verified by customer.

**Mounting Foot Kit**

has four polycarbonate feet and four M3 self-tapping zinc plated screws. Kit is field installable. Maintains listed ratings for enclosure.

**Hardware Kit**

includes four polyamide cover screws and four M5 self-tapping zinc plated panel screws. This kit is offered as a replacement kit for lost or damaged hardware originally furnished with the enclosure.
