Legacy Signal Module: 250 Volts
 HDS Signal Module: 120 Volts
 Power Module: 250 or 600 Volts (Ref. to pads layout in section 7.2)

Connector Rating per UL-1977

Connector voltage rating meets the connector approval level defined by UL 1977, Sect. 11 for spacing per table 11.1. Example: 1.2 mm for ≤ 250 volt; 3.2 mm for ≥ 250 volt.

Exception taken for spacing less than those specified are permitted, if the device complies with the requirements in the dielectric voltage withstanding test per Sect. 17

Application Voltage Guideline

For application voltage requirements please refer to UL-60950 or other applicable standards, the creepage & clearance also needs to be determined based upon pads/traces on the PCB.

4.2 CURRENT RATING (MAXIMUM AMPERES)

Signal Contact: 2.5 Amps
 HDS Signal Contact: 4.5 Amps
 Power Contact:

1. Tested with PCB Copper Planes: See charts on page 11.

No. of Power Circuits	1-Ckt	2-Ckt	4-Ckt	8-Ckt
Current (Amps)	TBD	85Amps	TBD	TBD

** Tested in accordance with EIA-364-70.

The connector is mounted to a 10-layer PCB with 2oz per layer copper planes. Rating shown represents maximum current of a 2Ckt connector at 30°C rise over ambient temperature.

2. Tested with Copper Coupons: See charts on page 10

No. of Power Contacts	1-Ckt	2-Ckt	4-Ckt	8-Ckt
Current (Amps)	62Amps	59Amps	57Amps	53Amps

**Tested in accordance with EIA-364-70.

The above current ratings are based on testing connectors mounted on a copper coupons. Rating shown represents maximum current carrying capacity at 30°C rise over ambient temperature.

“Current rating is application dependent and should be used as a guideline. Appropriate rating is required per ckt size, ambient conditions, copper trace size on the PCB, gross heating from adjacent modules/components and other factors that influence connector performance”.
