1.00MM (.039") PITCH MEZZANINE IEEE 1386

Molex's 1mm Mezzanine connectors follow the IEEE 1386 specification, which is a 64-pin mezzanine interface used for PCI Mezzanine Cards (PMCs) typically found in CompactPCI and VME based systems. PMCs have evolved to PCI-X and packet-based transports, enabling mezzanine expansion cards to be faster and handle more information while still backwards-compatible to existing PCI standards (32 or 64 bit). With PCB density increasing every year, 1mm Mezz will continue to support mezzanine solutions to provide customers with extra PCB real estate and increased system functionality.

Molex's 1mm Mezz system offers stack heights from 8-15mm for design flexibility and signal speeds of up to 5Gb/sec. Gold over nickel contact plating ensures long-term reliability, and a leaf-style contact design prevents stubbing when mating. Molex parts are RoHS compliant and come with pick-and-place caps for automated assembly.
