EJT Series

The EJT Series is a power inlet filter designed to attenuate noise up to 1 GHz. This inlet uses an IEC 320/C14 input connector which gives it a maximum rating of 15 amps*. The EJT series is flange-mounted with optional outputs of 1/4" terminals or wire leads. This product was designed to address the demand for more noise attenuation at higher frequencies in a compact inlet.

*10 amp max. according to VDE.
