## Product Specification

108-5318

### .040 Series Multi Lock I / O Connector

(Non Inertia Type)

1. Scope :

1.1 Contents

This specification covers the requirements for product performance, test methods and quality assurance provisions of .040 Series Multi Lock I / O Connector (Non Inertia Type)  
Applicable product descriptions and part numbers are as shown in Appendix 1.

2. Applicable Documents :

The following documents form a part of this specification to the extent specified herein. In the event of conflict between the requirements of this specification and the product drawing, the product drawing shall take precedence. In the event of conflict between the requirements of this specification and the referenced documents, this specification shall take precedence.

2.1 AMP Specifications :

- A. 109-5000 Test Specification, General Requirements for Test Methods
- B. 114-5111 Application Specification .040 Series Receptacle Contact Crimping Specification
- C. 501-5063 Test Report :

2.2 Commercial Standards and Specifications :

- A. JIS C 3406 Low Voltage Cable for Automobiles

CLASSIFICATION: Release

3. Requirements :

3.1 Design and Construction :

Product shall be of the design, construction and physical dimensions specified in the applicable product drawing.

3.2 Materials :

A. Contact :

Tab Contact: Pre-tinned brass, or Plain brass with selective gold plating over nickel underplate

Receptacle contact: Pre-tinned phosphor bronze strip, or plain phosphor bronze strip with selective gold plating over nickel underplate

B. Housing :

Polybithylene: terephthalateresin (PBT)

3.3 Ratings :

A. Temperature Rating: - 30 °C to 105 °C

3.4 Performance and Test Descriptions :

The product shall be designed to meet the electrical, mechanical and environmental performance requirements specified in Fig. 2. All tests shall be performed in the room temperature, unless otherwise specified.

3.5 Test Requirements and Procedures Summary :

Para.	Test Items	Requirements	Procedures															
3.5.1	Confirmation of Product	Product shall be conforming to the requirements of applicable product drawing and Application Specification .	Visually, dimensionally and functionally inspected per applicable quality inspection plan.															
Electrical Requirements																		
3.5.2	Termination Resistance (Specified Current)	<table border="1" style="display: inline-table; vertical-align: top;"> <tr> <td>Wire Size</td> <td>Test (A)</td> <td>Resistance</td> </tr> <tr> <td>mm<sup>2</sup> (AWG)</td> <td>Current</td> <td>mV / A</td> </tr> <tr> <td>0.5 (# 20)</td> <td>1</td> <td>(mΩ Max.)</td> </tr> <tr> <td></td> <td></td> <td>Initial : 10</td> </tr> <tr> <td></td> <td></td> <td>Final : 20</td> </tr> </table>	Wire Size	Test (A)	Resistance	mm <sup>2</sup> (AWG)	Current	mV / A	0.5 (# 20)	1	(mΩ Max.) ## Quality Assurance Provisions :

## 1. Sample Preparation

The test samples to be used for the tests shall be prepared by randomly selected from the current production, and terminated in accordance with 114-5111, Application Specification, Termination of 040 Series Receptacle Contacts.

No sample shall be reused, unless otherwise specified.

## 2. Test Conditions :

All the tests shall be performed under any combination of the following test conditions, unless otherwise specified.

Temperature : 15~35 °C

Relative Humidity : 45~75 %

Atmospheric Pressure : 86.7~107 kPa (650~800 mmHg)
