Compact RFI Line Filter with DC Inlet Connector

DA Series

UL Recognized CSA Certified **TUV Approved**

DA Series

The DA Series filters were designed as general purpose line filters for DC applications up to 125VDC. They are compact with a 3-pin inlet connector. They are available in 3, 6, 10 and 15 amp versions. They are flange mount with 1/4" or PCB terminals.

The DA Series addresses the increasing need for DC rated filters with a standard DC power inlet. It was designed and first used for communication oriented customer premises equipment and central office equipment, but is not restricted to that. Any internal DC connection within larger multi-component systems, or external DC connection between user installed components which require filtering will benefit. Some examples include desktop servers, routers, switches, multiplexors, aggregators, concentrators, process control equipment as well as DC powered peripheral equipment.

The DA Series mates with a standard MOLEX connector (HCS Series) which is readily available and better prevents accidental connection to AC power.

Specifications

Hipot rating (one minute):

line-to-ground 2250 VDC line-to-line 1450 VDC Rated voltage (max): 125 VDC Operating ambient temperature range

@ rated current I_r: -10°C to +55°C

In an ambient, Ta, higher than +55°C, the maximum operating current, I_0 , is as follows: $I_0 = I_r \sqrt{\frac{90 - T_a}{35}}$

Minimum insertion loss in dB:
