

## DisplayPort to DVI Active Adapter Video Converter, DP ver 1.2, (M/F), 6 in., 50 pack

MODEL NUMBER: P134-06NDVIV2BP

Active adapter connects a DVI display to the DisplayPort (DP) output on your laptop or desktop computer for playing 1080p video.

### Features

**DisplayPort 1.2 to DVI Converters Connect DP Source to DVI Display** This set includes 50 Tripp Lite P134-06N-DVI-V2 DisplayPort to DVI active adapters. Each adapter connects a DVI monitor, projector or television to the DisplayPort output on your PC, Mac, Chromebook, MacBook, Microsoft Surface or other compatible computer or tablet. They feature a male DP connector and a female DVI-I dual-link connector, allowing you to continue using your existing DVI display and DVI cable to transmit video signals without the expense of a new DP display.

**Transmit Outstanding 1080p Video for High-Definition Presentations** Ideal for classrooms, lecture halls and anywhere else you may need to connect to a DVI monitor, these DisplayPort to DVI converters support high-definition video resolutions up to 1920 x 1080 (1080p). The active adapters convert both Single-Mode and Dual-Mode (DP++) DisplayPort output. They come recommended for use with graphics cards, such as AMD Eyefinity, that do not output DP++ signals.

**Ready to Use Right Out of the Package** The plug-and-play DP to DVI adapters require no software, drivers or external power, work with both Windows and Mac operating systems, and are compatible with laptops, tablets and other devices equipped with a female DisplayPort. With its small size and built-in cable, the P134-06N-DVI-V2 is recommended for stowing in your laptop bag and carrying to school or the office.
